

interactive lightbulb notes

Interactive lightbulb

Draw a lightbulb w/ a cord →

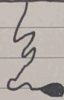

Pressing down arrow key tugs
cord

(tense, jittering back and fourth)

Releasing down makes the cord jump up
as if let go after pulled ↓

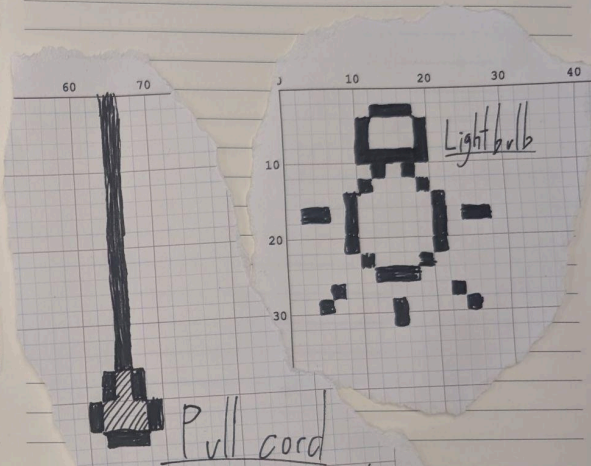

releasing down is what toggles the bulb.

Background changes between ~~white~~
white and black depending on
off or on

Spanning down makes bulb ~~explode~~

Pixel sketches.

Pull cord

(this looks bad, redraw
later) (draw it jumping
up like this: ↓

for when
down is
released)
